Principles and Applications of Geographic Information Systems (GIS)
Use of GIS has seen unprecedented growth in the last ten years. With the powerful technology getting cheaper and system memories expanding, meaning that we can handle much bigger sets of data, some say that GIS is in a golden age.

Recommendation systems have also proved to improve decision making process and quality . In e-commerce setting, recommender systems enhance revenues, for the fact that they are effective means of selling more products . In scientific libraries, recommender systems support users by allowing them to move beyond catalog searches.

The systems modernization you need today is more than an upgrade; you're playing a new game with new rules, in which you modernize not just the tools and functions, but the way you do IT. The vendors are largely the same, but the options and principles of the past no longer apply. Hardware no longer stands alone.
