Step 1: Soak Seeds in Water Before sowing the seeds, remember to soak them first in water. If your seeds are more fresh, then soaking for 2-4 hours can compensate for moisture loss over time. If the seeds are a bit older, then soaking for 24 hours will help soften up the shell & boost germination rate.

This common herb will self-sow readily, if the prickly seeds don't get snagged in the fur of passing cats and dogs first. The yellow-orange variety is the classic, but we're especially thirsty for dusky-peach 'Zeolites' and aptly named 'Bronze Beauty' (pictured, and which dips a toe into ivory and heathery rose shades, too)—they make a stupendous addition to a cut-flower garden.
