Just winterize my boat on a 2006 350 mercruiser, all i saw was a drain plug on top and the bottom, and I could not find - Answered by a verified Marine Mechanic

Winterize your Gas Inboard or Sterndrive | West Marine

Keep moist air from getting inside your engine and tanks. Seal air inlets, crankcase and transmission breathers, exhaust ... them in place with plastic tape to create an airtight seal. Try to do this on a dry day so you do not seal in moist air.

De-Winterizing Your Boat for Spring - LiveAbout

For inboard and sterndrive engines: Flush the engine with clean water by using water muffs or a similar device to connect ... reaches normal operating temperature. Next, remove drain plugs. These are usually located in the engine block and ...
